

**USE OF POLYOXYPROPYLENE/POLYOXYETHYLENE TERPENE COMPOUNDS
AS DEGREASING AGENTS FOR HARD SURFACES**

Abstract of the Disclosure

The invention concerns the use in degreasing/cleansing applications of hard surfaces, such as metal surfaces, of at least a compound derived from a terpene and comprising a number of oxypropylene units ranging between 3 and 5, and a number of oxyethylene units ranging between 6 and 10, exclusively. The compound is provided with a concentration lower than 10 g/l, more particularly between 0.01 and 5 g/l, when used.
